EDUCATION

Institute of Aeronautical Engineering College

Bachelor of Technology in Computer Science

Hyderabad, IN

Aug. 2016 – May 2020

Kendriya Vidyalaya

Senior Secondary - Science Stream

Bowenpally, IN

Aug. 2014 – May 2016

EXPERIENCE

SDE - Full Stack Developer

Jul 2022 – Present

Fitmint

Remote

- As part of a founding team at a Web3 company, I designed and built numerous prototypes and applications for crypto and NFTs. Notably, I spearheaded the creation of a user-friendly marketplace where FITT tokens serve as the currency for buying and selling NFTs.
- Developed a Dashboard for 3D avatars and Support side applications using NextJS for managing the users for our support team.
- Worked on Complex UI, Custom Animations, Maps, live user tracking, and app notifications in our Flutter App.
- Worked on core features that had brought many users increased the DAU up to 25% and helped generate revenues for the company.
- Delivered 2 Minimum Viable Products (MVPs) within a tight timeframe (45-60 days) and successfully transitioned them to production-ready applications.

Software Engineer - UI Developer

Jun. 2021 – Jun 2022

Tata MD

Remote

- I spearheaded the enhancement of our company's Flutter App, introducing innovative features and resolving glitches to ensure seamless access for employees seeking timely medical attention and connectivity with healthcare professionals during the challenging times of COVID-19 outbreaks.
- The entire patient-to-doctor journey has been seamlessly automated and digitized through user-friendly mobile and web applications
- Worked on different Web App POCs like live streaming and Video Calls using WebRTC and some other services according to requirements that are rolled out during the pandemic.
- Rapidly built essential Flutter apps to empower frontline workers in effectively managing medical emergencies within organizations.

SDE - Full Stack Developer

Apr 2020 – Jun 2021

Mavex

Remote

- Developed both Native Android App & Web App (React JS) for both client and admin facing side for DIY events platform keeping stability & future scalability in mind.
- We crafted two mobile MVP applications from inception, meticulously refining them before unveiling them to our community for rigorous product validation and bug detection. This pre-public rollout ensured a seamless transition to the final production build.
- Developed custom features for clients based on their custom requests dashboards and many features which increased customer retention to 30% of our overall MAU.
